## SPRAY HOG

Commercial Diesel-Powered Hydraulic Airless Sprayer

The Spray Hog's patented system is specifically designed to make spraying waterproofing and vapor barrier coatings easy. The Spray Hog's self-contained heat source allows coating material to be heated in a single pass. This heat lowers the viscosity of the material for better spray application. The Spray Hog having its own self-contained heat source makes it very portable.

**\$22,995.00** (Bare)

Package Includes:

**\$25,995.00**

Spray Hog with "New 250cc Extreme Pump Lower"  
Kubota 18hp diesel with Siphon Side Heat  
Exchanger
